

## GRUNDFOS ORIGINAL SPARE PARTS

# Keep pumps running smoothly

### INCREASE EFFICIENCY AND RELIABILITY

By choosing Grundfos original spare parts, you can be sure that the spare parts you install are **engineered to meet exact design specifications**. This will keep your pumps and systems running smoothly, cost-effectively and efficiently for years to come. Spare parts that are not made to meet exact pump specifications may not be able to handle your application requirements causing sudden failures and expensive inefficiencies. Grundfos spare parts and kits are **backed by rigorous testing, ensuring years of reliable service** and the most efficient operation.

### STOCK UP THE WAY YOU WANT

With Grundfos original spare parts, you can stock up with the spare parts you need, the way you want — from single parts to large bulk orders. This means you have access to everything your systems require, no matter the application, challenges, pump types, location or organisation size.

With Grundfos original spare parts, you get:

**FEWER SURPRISES**

**GREATER RELIABILITY**

**INCREASED EFFICIENCY**

### RECOMMENDED SPARES

When you buy a Grundfos pump, we can provide a list of recommended spare parts for any sudden replacement needs.

### ORIGINAL SPARE PARTS

Individual Grundfos spare parts can be purchased either with new pumps or as needed. With the long life of Grundfos pumps, parts are available for up to 10 years if a pump were to be discontinued.

### SERVICE KITS

Our service kits are a one-stop-shop to ensure you have all the spares you need to service your pump or system. With a service kit, you help minimise downtime and future-proof performance.
