

END-TO-END WASTEWATER SYSTEMS

We provide end-to-end wastewater system design that mitigates risk for ultimate peace of mind. Saving you time, costs, and maintenance. Commissioning and customised service agreements mean you have optimised operations from the start.

END-TO-END DESIGN

We offer complete transparency, using deep application knowledge and expertise. Advanced simulation tools, test programmes and informed decisions reduce costs of construction for simple or complex solutions.

- Save spend on model or full-scale point-testing with complete network simulation
- Prevent hydraulic issues like water hammer with flow modelling
- Reduce amount of concrete used and size of pumping station footprint

PUMPING SOLUTIONS

Our experience with water technology and wastewater applications helps us support you better. We supply innovative solutions that meet all wastewater flows for reliable and trouble-free operation.

- Meet the ever-changing requirements of wastewater with the SE and SL wastewater pumps, that come with a range of hydraulic designs
- Combine our prefabricated, modular pumping stations with piping, valves and level controls to suit your specific wastewater application requirements
- Keep operational reliability high and prolong system lifetime with Dedicated Controls, that provide effective alarm handling, surveillance and workflow scheduling

SERVICE AND SUPPORT

We provide support services throughout selection, installation, operation and maintenance. With a Grundfos service agreement, you can leave your service, maintenance and analysis to experienced professionals.

- Reduce risk of future pump operation issues with correct installation and commissioning
- Ensure optimal operation time with Grundfos pumps, designed for easy service
- Reduce energy consumption & improve pump efficiency with our Energy Audit diagnostic tool
- Predict maintenance with our digitally-enabled cloud based service solutions that utilise pump operational data

GLOBAL COMMITMENT

Our strong foundation of craftsmanship, state-of-the-art facilities and dedicated experts show our commitment to wastewater management and give you a smarter way of working with complex projects.

- Supplying reliable and optimised systems since 1945
- +19,000 specialists, 34 Grundfos plants, 15 assembly plants and 100 companies across 59 countries
- The world's #1 pump manufacturer, producing 16,000,000 units every year
